

QUICK TIPS: VIRTUAL CASE- BASED LEARNING

While you're continuing to teach your courses online, keep the following quick tips in mind for optimal virtual classroom engagement to meet your course and class objectives and outcomes.

CASE-BASED LEARNING VS PROBLEM-BASED LEARNING

In a CBL teaching session, the faculty use cases to drive inquiry and they are more active in establishing guided discussion prompts as well the summarization of key concepts of the case. In PBL teaching, the faculty's role is more passive and less guided, allowing students to have a stake in their own learning and rely on each other to drive problem-solving of cases.
